Education

Indian Institute of Technology (ISM), Dhanbad, India

Bachelor of Technology (CGPA: 8.29/10)

2023 – 2027

Relevant Coursework: Data Structures & Algorithms, Object Oriented Programming (C++), Operating Systems, Database Management Systems (DBMS), Compiler Design

Experience

Google | Software Engineer Intern

May 2026 – Jul 2026

- Engineered a new linting rule and automated batch validation pipeline in Java and TypeScript to detect structural errors across cloud contract templates.
- Enhanced core template management interfaces by developing a responsive document comparison dialog box, a read/write mode selector for gDoc, and an embedded AI assistant chat widget.
- Contributed 7,350+ lines of production code across 22 peer-reviewed changelists and created analytical dashboards for contract monitoring and template health tracking.

Projects

Code Fusion | React.js, MongoDB, Yjs, Socket.IO, ExpressJS

[Deployed](#) | [GitHub](#)

- Built a CRDT-based real-time collaborative code editor using Yjs and Monaco Editor, enabling conflict-free multi-user editing through delta-based synchronization and awareness protocol for live cursor tracking across sessions.
- Developed a real-time collaboration system supporting live cursor tracking and integrated in-app chat, allowing seamless communication between distributed developers during shared coding sessions.
- Implemented multi-language support, auto-completion, real-time syntax error detection, persistent code storage, customizable themes, and a collapsible file explorer for efficient workflow management.

JobPilot | FastAPI, Next.js, Socket.IO, LangChain, Tailwind CSS

[GitHub](#)

- Developed an automation system using FastAPI, Next.js, and HuggingFace LLMs to automate resume extraction and job matching, reducing manual application time by 80%.
- Architected a scalable asynchronous worker system with WebSockets/Socket.IO updates and FileLock synchronization to manage concurrent multi-user job lifecycles.
- Built an LLM-powered job ranking and categorization pipeline using prompt engineering, along with a manual review workflow and local validation setup.

Competitive Programming

LeetCode: [aswU2SZvDg](#) | Solved 240+ problems focusing on data structures and algorithms

CodeForces: [anirban2005](#) | Max Rating: 1216 (Pupil) | Solved 390+ problems

Technical Skills

- Languages & Databases:** C++, Python, JavaScript, TypeScript, MongoDB, PostgreSQL, Vector Databases
- Core Frameworks:** React.js, Next.js, Node.js, Express.js, FastAPI, Tailwind CSS, Three.js
- AI/ML & Tools:** LangChain, LangGraph, TensorFlow, Keras, Git, Docker, Postman

Achievements

- Secured **4th** rank at [HaXplore](#) | [CodeFest'25](#), organized by [IIT BHU](#).
- Winner** of Winter of Code 6.0 (Web Development Division), a one-month long hackathon conducted by [CyberLabs](#), IIT (ISM) Dhanbad. | [Deployed Project](#)
